

DOCCS Unveils New Inmate Puppy Training Program

The Albion Correctional Facility (Orleans County) has begun a new initiative to add to the rehabilitation efforts of inmates and at the same time help improve the local puppy adoption rate. The Canine Training Program (CTP) allows inmates at the facility to work with a local shelter to provide basic obedience training and socialization skills to select canines so they may be more quickly adopted. During the process, the inmate will also benefit by learning viable canine handling skills while receiving secondary social and emotional benefits. To see a video about the program, [click here](#).
