

Bare Hill Correctional Facility Receives Grant for “Mothers Room”

Bare Hill Correctional Facility recently received a “Creating Breastfeeding Friendly Communities” grant from the Department of Health. This grant, which is an effort to partner with employers in order to provide greater support for breastfeeding families, was used to establish a “Mother’s Room” at the facility. The room was furnished with a comfortable chair, table, lamps, a refrigerator, artwork, and resource materials in order to provide a private, relaxing environment for nursing mothers who work at the facility.
